July 16-20	Bookworms (Early Love of Reading)	August 20-24	Bookworms (Early Love of Reading)
July 23-27	LITTLE ENGINEERS	August 27-31	LITTLE ENGINEERS and Early Number Sense

Creative Arts exposure to the various visual arts mediums (water-based paints, watercolor, acrylic, pastels, etc.) daily.

Little Space Explorer's will develop and widen camper's curiosity about outer space, planets, space station, etc. and learn about Chris Hadfield, the first Canadian astronaut to walk in space. Kids will be curious to learn how to sleep, brush teeth, eat, and shower in a space station. This is an inquiry-based camp (within a concept) where children are encouraged to wonder and ask questions, like, what happens to our tears if we cry in space? and certain activities will be geared towards that inquiry.

Bookworms (Early Love of Reading) camp aims to nurture and develop young campers to appreciate and love reading, in a fun, engaging, and stimulating environment.

LITTLE ENGINEERS camp focuses on but not limited to children's dexterity and hand-eye coordination. Campers will be exposed to various STEM toys, LEGO's, Meccano, TechnoGears, Clickformers, etc. and activities that stimulates the creativity and ingenuity out of your budding engineers. Possible exploration outside the classroom (if the weather permits) and explore/identify things within the camp's theme.

Early Number Sense Out-of-the-box introduction to numeracy and number sense for young learners in a play-based and interactive environment.
